

ACE: Dreamweaver CC Exam Guide

Certified Expert
DREAMWEAVER® CC

Adobe Training Services provides this exam guide to help prepare partners, customers, and consultants who are actively seeking accreditation as Adobe Certified Experts (ACE). This guide, while designed to describe the exam in detail and provide as much information as possible, is not meant to be the sole means of exam preparation. Adobe Training Services offers courses that provide in-depth training on the exam content. Hands-on experience with the Adobe product suite is also a critical element in preparing to pass any Adobe certification exam.

ACE: Dreamweaver CC exam overview

The ACE: Dreamweaver CC exam audience are individuals who have a minimum of three years' experience as a web developer. You should have experience with architecting a site, designing page layouts, coding pages, and formatting page elements with CSS. You should also be familiar with web standards and be able to render pages in modern web browsers. A knowledge of Adobe Photoshop, as well as IDEs for hand coding, is also suggested.

Exam description

The exam has two parts:

- 47 multiple-choice questions, covering a range of topics listed below
- A short survey that we use to gather information about your product experience

Please note that the survey must be completed to qualify for earning the certification. The certification exam has a time limit of 65 minutes, and includes a timer to mark the remaining time.

Exam scoring

The certification consists of achieving the minimum passing score, which is 66%, on a multiple choice test. After completing the test, candidates will be immediately provided with the official score for the exam.

Scheduling exams

The ACE: Dreamweaver CC exam is delivered through an independent testing provider, Pearson VUE. First time candidates can view the step-by-step online scheduling guide here: http://www.pearsonvue.com/reg_guide/.

Returning candidates can register for exams here: <http://www.pearsonvue.com/adobe/>. Note that you will be prompted to login before you may register for exams.

Exam preparation

The following are typical tasks that you should already be able to perform:

- Define sites for FTP connection
- Create, edit, and delete pages
- Build a site map and manage pages/assets

- Add content such as text, images, and rich media to pages
- Insert HTML5 audio and video content
- Format text and images with CSS
- Apply Edge Web Fonts to format text content
- Author HTML code
- Create responsive layouts
- Deploy and manage sites

Exam topics include:

Navigating the Workspace

- Working with the Document window
- Managing files in the Files panel
- Updating properties in the Property inspector
- Configuring workspace layout and docked panel sets

Defining a Site

- Creating the local root folder
- Setting server information with hosting account details
- Connecting via FTP

Creating Web Pages

- Using the New Document dialog box
- Organizing the site structure
- Setting Page Properties
- Previewing pages in a browser

Laying out Pages

- Using the Structure section of the Insert panel
- Creating responsive layouts

Adding and Formatting Text

- Applying Edge Web Fonts to text content
- Inserting special characters
- Using Find and Replace
- Using Spell Check
- Understanding paragraph and header tags
- Inserting line breaks
- Creating lists

Working with Cascading Style Sheets (CSS)

- Understanding basic CSS syntax
- Creating and managing CSS styles using CSS Designer
- Applying styles using the Property inspector
- Using CSS Designer to visually define CSS properties
- Creating transitions with the CSS Transitions panel

Adding and Managing Links

- Understanding basic link types
- Creating links using the Property inspector
- Creating content navigation

Adding Images and Rich Media

- Inserting images

- Using the Property Inspector to update and edit images
- Inserting Flash content
- Inserting HTML5 video and audio

Writing HTML Code

- Using the Code view of the Document window
- Making changes to code using Design view of the Document window
- Selecting specific code
- Understanding related files
- Working with behaviors

Working with Templates and Library Items

- Creating and applying templates
- Inserting editable regions
- Editing and updating templates
- Creating and editing Library items

Writing with Mobile Devices

- Using jQuery Mobile
- Understanding PhoneGap

Launching a Site

- Transferring files to the remote server/local machine using Get and Put
- Understanding and using Check In/Check Out
- Uploading a site using the Files panel
